

** Northwood Dental reserves the right to cancel your Whitening for Life program if you are not seen for your regular preventive cleaning (re-care) appointments at Northwood Dental. You need to be seen within one month of your regular preventive cleaning appointment, which is typically once every six months. In addition, if you are no longer being seen at Northwood Dental as a patient the Whitening for Life program will cancel.

There will be no additional charges for whitening product as long as you maintain your regularly scheduled preventive cleaning appointments.

You are required to bring your trays with you to each hygiene appointment so that we can ensure they are still functioning properly.

There will be a charge to replace lost or damaged whitening trays.
